DEW STUDIO

DEW, Developer Efficiency Workbench, is an innovative **'software development framework'**

Creates complex business software applications - **with virtually NO CODING**

Cuts **software development Time & Cost by 50-60%**

Techrev is proud to introduce **DEW,** our hottest cutting-edge creation - **designed BY developers FOR developers**

DEW ENABLES YOU TO **SAVE 50%** ON COST AND TIME
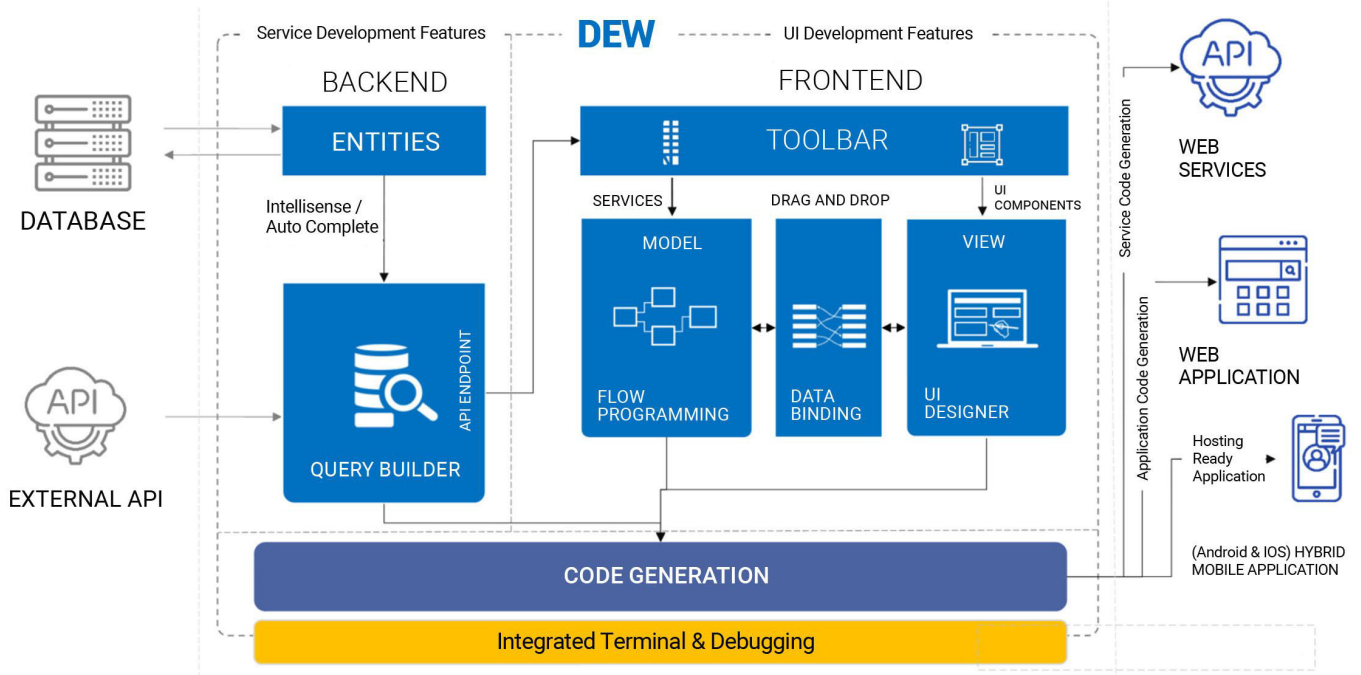

KEY FEATURES

- Quickly **Convert Business-ideas** into **working** cross-platform-**applications**.

- This tool incorporates an extremely efficient **intuitive method** of software development.

- It uses 'Drag & Drop' technology with 'Connectors' and uses 'Visio-like canvas' to intuitively do programming /coding

- **DEW's Artificial Intelligence in the Cloud** converts **programmer's actions** and resultant flow-diagrams and **graphical representation into software-code.**

- DEW's **embedded Cross-platform development feature,** enables development of – Web and Mobile (Both iOS & Android), Applications /Apps.

- Software development is independent of databases.

- Output is BOTH Application(s) & Entire-**Programming-Code (Automatically generated)**

- Senior programmers don't have to learn new language & framework features to generate business applications

- Focus on providing efficient applications – NOT coding

- Virtually No-Coding – DEW * tool generate the code for you
- MVVM - Model View View Model Development
- Drag and Drop Support – UI, Data Integration & Flow Programming

DEW
Low Code
No Code

- Intuitive Flow Programming
- Graphical Wiring for UI & Data Integration
- Single tool for building Queries and Services (Query Builder/ Service Builder)
- Cross Platform - Mobile & Web

CODE GENERATION PROCESS
The process that makes DEW faster, a true RAD and IDE

* 2 PATENTS Pending
